## Mini Inverter 2846-20 Tool only

This compact M18 Top-Off inverter gives you portable  
AC and USB power for tools, devices, and small  
batteries when you really need it.

**\$99**

This is not a new tool from Milwaukee, but it's one that can definitely save you in a pinch. The **M18 Top-Off** is a compact inverter equipped with a 15W USB-A port, a 45W USB-C PD port, and a 120V AC outlet rated for 175W. I have used it to charge my phone and my head lamp. I've even used the 18V battery to charge 12V batteries.

When paired with an XC8.0 battery, the inverter took that 12V battery from dead to fully charged in under 30 minutes—and the 18V pack still showed a full charge afterward. During a recent power outage, my laptop battery lasted through the first four hours of what was supposed to be a full day of desk work. Luckily, I remembered the inverter.

This time, a fully charged battery ran the inverter for just over an hour, enough time to almost fully charge my laptop and buy me another four hours of productivity. You might go months without using the **Milwaukee M18 Top-Off**, but when you need it, you'll be glad you spent the \$100 (tool only) on it.

Dust Shrouds, reducing exposure to dangerous debris, crystalline silica, and dust particles that pose health issues for pros. These four Dust Shrouds provide a solution for regulating respirable crystalline silica dust (29 CFR 1926.1153).

## EZ-POUR REPLACEMENT SPOUT UNIVERSAL GAS CAN SPOUT KIT
